installation and configuration of Active Directory creating
Users and groups, setting user access controls, domains
creation and setup.

Experience

Automated Systems Assistant 2 Orange County Public Defender's Office

01/2021 to Current
Orlando, FL

- Troubleshoot and resolve software and hardware incidents, including Windows OS and across a range of software applications
- Manage Microsoft Active Directory and Azure server for an organization of 250+ employees.
- Provide level 2 and 3 support for clients to solve problems over varying complexity ranges.
- Use of Sophos Central to administer Endpoint protection and Server protection to avoid malicious attacks and phishing emails
- Deploy desktop workstations, scanners, and printers and also keep inventory logs.
- Use Microsoft 0365 ECP to create new users' mailboxes. Also, to give employees access and permission to Outlook calendars.

Desktop Technical Support Dell EMC

04/2020 to 10/2020
Lake Mary, FL

- Received and responded to incoming calls, and emails regarding PC, Hardware, and software problems
- Evaluated, prioritized, and responded to service requests with a resolution
- Other responsibilities included installing, configuring, and troubleshooting end-user workstation software/hardware, network peripheral devices, and networking software/hardware products

Junior System Administrator Trinitech Consulting Global

05/2016 to 12/2019
Beltsville, MD

- Implement proper systems patching to address security vulnerabilities and accurately report security incidents.
- Implemented auditing and collection of system logs and monitoring activities on Windows, Unix, and LINUX platform
- Performed multiplatform server builds on VMware, which include Windows 2008, Solaris 10, Centos 7, and 8. Responsible for assigning hostname, static IP addresses, default gateway, and DNS
- Performed day-to-day UNIX/LINUX administration tasks such as user account management, directory services, file system sharing, and permissions.
- Set up the yum repository in the server, upgraded the repository by appropriate patching and installing software packages and services using yum and rpm as required.

Education and Training

Bachelor of Science: Information Technology Seminole State College of Florida

12/2022
Sanford, FL

- I made the dean's list multiple times, President's list and was recognized as an honor graduate

Certifications

- AWS Certified Cloud Practitioner
